## About

Very brilliant QA team lead and engineer's summary goes here

## Work

### AnyLogic

October 2019 – Now

Head of QA Team

<https://the.anylogic.company>

Руководила QA командой. Отвечала за качество двух продуктов. Планирование. Сама тестировала

#### Highlights

- Redefined company QA processes achieving a business goal of focusing on product stability and comprehensive quality control. Improved project workflows and Jira ticket culture.
- Significantly reduced the amount of issues escalated thru customer support.
- Conducted over 30 job interviews resulted in hiring of eminent QA engineers.
- Mentored junior QA engineers, held regular one-to-one check-ins, provided support and guidance helping the team to thrive. Improved onboarding process and documentation.
- Coordinated new releases testing: issue triaging, optimal resource allocation and utilization.
- Worked in close collaboration with development teams, participated in new feature design.
- Performed manual feature and bugfix testing, conducted regression testing.
- Developed a set of automated API tests in Python.
- Constant testing documentation perfection.

### ALM Works

July 2018 – October 2019

QA Engineer

<https://www.almworks.com>

#### Highlights

- Manual functional, regression and exploratory testing of web applications (add-ons for Jira)

- Analysis and test design for functionalities under test
- Working with bugs: localization, creating bug reports, verification of fixes
- Creating and maintenance of test documentation (check lists, mind maps, knowledge base) in English
- Working in SCRUM team

## AnyLogic

August 2014 — July 2018

### QA Engineer

<http://the.anylogic.company>

#### Highlights

- Test planning, creating check-lists
- Manual testing of new functionality, regression testing
- Web application and desktop simulation modelling IDE testing
- Communication with developer team
- Participation in making of tasks list for the next release
- Introduced and maintained the testing process in the project (was solely responsible for all test activities)
- Initiated regular review of tasks lists for big releases that happened every 3-6 months in order to introduce necessary changes in the planned tasks and, as the result, significantly reduced the number of releases that were postponed due to unmet aims

## Skills

### Testing

- Test Design
- Test Plans

### Technical Skills

- git
- Java
- Python
- Jira

## Education

### St. Petersburg State University, Saint Petersburg

January 2007 — January 2012

🎓 Statistical Modelling, Applied Mathematics and Informatics
