

Maria Dumanskaya, QA Engineer

masha.dumanskaya@gmail.com | +79811248428 | St.Petersburg, Russia

SUMMARY Very brilliant QA team lead and engineer's summary goes here

EXPERIENCE AnyLogic, Head of QA Team

2019-10 — Present

<https://the.anylogic.company>

- Руководила QA командой. Отвечала за качество двух продуктов. Планирование. Сама тестировала
- Redefined company QA processes achieving a business goal of focusing on product stability and comprehensive quality control. Improved project workflows and Jira ticket culture.
- Significantly reduced the amount of issues escalated through customer support.
- Conducted over 30 job interviews resulted in hiring of eminent QA engineers.
- Mentored junior QA engineers, held regular one-to-one check-ins, provided support and guidance helping the team to thrive. Improved onboarding process and documentation.
- Coordinated new releases testing: issue triaging, optimal resource allocation and utilization.
- Worked in close collaboration with development teams, participated in new feature design.
- Performed manual feature and bugfix testing, conducted regression testing.
- Developed a set of automated API tests in Python.
- Constant testing documentation perfection.

ALM Works, QA Engineer

2018-07 — 2019-10

<https://www.almworks.com>

- Manual functional, regression and exploratory testing of web applications (add-ons for Jira)
- Analysis and test design for functionalities under test
- Working with bugs: localization, creating bug reports, verification of fixes
- Creating and maintenance of test documentation (check lists, mind maps, knowledge base) in English
- Working in SCRUM team

AnyLogic, QA Engineer

2014-08 — 2018-07

<http://the.anylogic.company>

- Test planning, creating check-lists
 - Manual testing of new functionality, regression testing
 - Web application and desktop simulation modelling IDE testing
 - Communication with developer team
 - Participation in making of tasks list for the next release
 - Introduced and maintained the testing process in the project (was solely responsible for all test activities)
 - Initiated regular review of tasks lists for big releases that happened every 3-6 months in order to introduce necessary changes in the planned tasks and, as the result, significantly reduced the number of releases that were postponed due to unmet aims
-

EDUCATION St. Petersburg State University, Saint Petersburg

- Statistical Modelling, Applied Mathematics and Informatics
